

Waste Management

Protect your assets. Build your business.

Established in 1999, Allshelter are Australian manufacturers of relocatable and permanent fabric and hard top structures, that provide high quality weather protection to Australia and across the world.

Keeping your waste out of the rain keeps it lightweight and dry, making it easier to work with and significantly reduces the high disposal and transport costs of working with wet heavy material.

With large interior work areas unobstructed by columns, they are ideal for keeping waste, biomass, recyclate and potentially harmful loose materials under cover to avoid contaminating surrounding ecosystems. Fabric shelters are becoming increasingly popular for materials recovery facilities that require large scale processing plants that need to meet environmental regulations.

Weather Protection

Durable & Relocatable

Easy Installation

Sustainable

Non-Corrosive Cladding

Key Features

- Compact packaging
- UV stabilised fabrics
- 48hr* to 18 week lead time
- Australian Made
- Natural lighting
- Manufactured to strict ISO standards
- Engineered to AS/NZS 1170.2: 2021
- Wind Rated for regions A to D (Up to 288km/h)
- Low Carbon Footprint
- Contributes IS credits to projects in ISv1.2 and ISv2.0
- Relocatable
- Up to 15° Cooler

Versatile Uses

- Covered waste sorting areas
- Odour containment
- Waste transfer station
- Stockpile bunker covers to keep product dry and lightweight for transport
- Stockpile run-off control to control leaching into watercourses and soil
- Equipment & machinery maintenance
- Workshops

10 YEAR WARRANTY
