

Post Mounted & Brace Post Mounted Shelters

Maximum workspace, storage,
airflow and 360° access

Whether freestanding or joined to existing containers or structures, Allshelter Post Mounted Shelters provide a large open work and storage area. They are cool, waterproof, UV resistant, more compact than Container Mounted Shelters, and backed by our 10-year frame and cover warranty.

These clear span curved shelters are made from a strong modular steel framework covered by a waterproof fabric membrane and attached to steel posts with optional fabric side walls.

The standard posts can be embedded directly into a concrete slab to use minimum space onsite, while the braced post system has the flexibility to bolt to a concrete slab or bolt down to footings. This option reduces the foundations required by spreading the load, however it requires 1m of extra width on each side.

Post Mounted & Brace Post Mounted Shelters

Soon to Be Part of Our Express Range

📏 Sizes & Specifications

Mount	Standard post mounted or braced post mounted
Useable Width	6m – 20m wide
Standard Height	From 5 to 8.55m – posts are adjustable to either 2.59m (standard container) or 2.89m (hi-cube container)
Standard Length	Available as 6m, 12m, 18m or 24m
Warranty	10-year frame & cover

✅ Key Advantages

360 Degree Access	Entrances on both the sides and ends of the shelter maximise storage space and access.
Cool & Productive	Providing shaded work areas with natural air flow and options to close in the sides. Post mounted shelters can be up to 15°C cooler than steel clad buildings.
Protection in all Weather	Engineered to withstand gale force wind conditions up to and over 250km/h, they meet all wind regions & terrain categories as per AS/NZS 1170.2:2021.
Matches Container Heights	Posts can be adjusted to match either standard or hi-cube container heights, which allows containers on one side and posts on the other.
Compact	Being Post Mounted, they take up less space than Container Mounted Shelters and can extend your warehouse without expensive renovations.

Flexible Options

- Full Endwall*
- Partial Endwall
- Sidewall
- Banners & Signage
- LED Lighting

Versatile Uses

- Assembly area/covered meeting area
- Machinery storage
- Plant & equipment maintenance
- Construction camp sites
- Washdown bay

(*Please note that there will be some small gaps, mostly across the bottom of the endwall, which can be sealed later.
